

HVAC and Energy-saving Product Rebates

Indiana and Michigan

▶ Air Source Heat Pump

Rebates up to \$1,200 Limited Time

A heat pump can heat, cool and dehumidify your home. It can cut your heating cost by about 50% and your cooling cost by about 25% compared to electric furnace, baseboard or ceiling heat. Newer technology, makes a heat pump a smart energy-saving option - even in cold climates.

▶ Ductless Heat Pump / Mini Split

Rebates up to \$1,710 Limited Time

A ductless heat pump or mini split is perfect for homes with electric baseboards, ceiling heat or an electric furnace. It is ultra-quiet and provides maximum year-round comfort and control while cutting your heating and cooling costs 30% - 60%!

▶ Geothermal Heat Pump

Rebates up to \$1,200

Geothermal heat pumps are among the most efficient and comfortable heating and cooling technologies available because they use the earth's natural heat to provide heating and cooling. Geothermal systems can reduce energy consumption by up to 50% compared to air source heat pump systems.

▶ Packaged Terminal Heat Pump (PTHP)

Rebates up to \$250

Packaged Terminal Heat Pumps (PTHP) are ductless, convenient, all-in-one heating and cooling solutions. PTHPs are very energy efficient and use 1/3 less energy than standard air conditioning and heating. PTHPs are commonly found in hotels, senior housing, hospitals, apartment buildings, add-on rooms and sunrooms.

▶ ECM Furnace Fan Motor

\$100 Rebate

Furnace fans are among the home's biggest energy users. Traditional furnace motors operate at a constant speed. An ECM (electronically commutated motor) is a more efficient furnace motor with speed and torque controls built in. This allows the motor to adjust its speed to ensure optimal air flow at all times while using about 30% less energy.

▶ Central Air Conditioner

Rebates up to \$50

Today's air conditioners use about 50% less energy as air conditioners made in the mid-1970s. Even if your air conditioner is only 10 years old, it might be time to upgrade. You can save up to 40% of your cooling energy costs by replacing it with a newer, more efficient model.

▶ Wi-Fi / Smart Thermostat

Rebates up to \$100

A Wi-Fi thermostat allows you to control your home's temperature from anywhere, anytime. A smart thermostat learns your schedule to customize a home energy plan and give you energy savings.

▶ Water Heater

Rebates up to \$350

Water heaters are the second highest source of energy usage in the home. High efficiency electric water heaters and heat pump water heaters are easy choices for energy savings, performance and reliability. A high efficiency electric water heater can save a family of four over \$3,400 in energy costs over its lifetime compared to a standard model.

▶ Pool Pump

Rebates up to \$200

An energy efficient pool pump uses about 70% less energy than a standard pool pump. With a new pool pump you can save about \$200 each season.

▶ Dehumidifier

\$25 Rebate

An energy-efficient dehumidifier uses 30% percent less energy than standard models. With a new dehumidifier you could save \$200 over the life of the unit, while avoiding more than 2,800 pounds of greenhouse gas emissions.
