

Variable Frequency Drive Incentives

For *Indiana* Commercial & Industrial Customers

Did you know energy efficient VFDs can create drastic savings in production costs?

The Prescriptive Program offers cash rebates paid per unit installed to help offset the cost of the project. Projects will not require a pre-approval unless the total projected incentive exceeds \$10,000. This program has a cap of \$150,000 per site and \$300,000 per company per program year.

To Participate

- Step 1:** Review the list of energy efficiency measures.
Step 2: Purchase and install your energy efficiency equipment.
Step 3: Submit your application and supporting documentation: W-9, invoice, spec sheet, tax exemption form (if applicable).

VFD			
Inefficient Equipment	Efficient Equipment	Participation Units	Incentive Per Unit
No control	VFD added to 1-20 HP chilled water	HP	\$35
	VFD added to 1-20 HP heated water		\$70
	VFD added to 1-20 hp HVAC fans		\$85
Standard efficiency pump/motor combination	VFD added to 1-20 hp process pump/motor		\$85

Funds are limited and paid on a first come, first served basis. Projects submitted after December 11, 2020 will be subject to the incentive levels associated with the 2021 program.
