

# HVAC and Energy-saving Product Rebates

## Indiana and Michigan | 2022

### ▶ Wi-Fi / Smart Thermostat

**Rebates up to \$75** – A Wi-Fi thermostat allows you to control your home’s temperature from anywhere, anytime. A smart thermostat learns your schedule to customize a home energy plan and give you energy savings.

### ▶ Water Heater

**\$50 Rebate** – Water heaters are the second highest source of energy usage in the home. High efficiency electric water heaters is an easy choice for energy savings, performance and reliability.

### ▶ ECM Furnace Fan Motor

**\$100 Rebate** – Furnace fans are among the home’s biggest energy users. Traditional furnace motors operate at a constant speed. An ECM (electronically commutated motor) is a more efficient furnace motor with speed and torque controls built in. This allows the motor to adjust its speed to ensure optimal air flow at all times while using about 30% less energy.

### ▶ Pool Pump

**Rebates up to \$200** – An energy efficient pool pump uses about 70% less energy than a standard pool pump. With a new pool pump you can save about \$200 each season.

### ▶ Dehumidifier

**\$25 Rebate** – An energy-efficient dehumidifier uses 30% percent less energy than standard models. With a new dehumidifier you could save \$200 over the life of the unit, while avoiding more than 2,800 pounds of greenhouse gas emissions.

Home Energy Products	Indiana Customer Rebate	Michigan Customer Rebate
<b>Wi-Fi/Smart Thermostat</b>		
Wi-Fi Thermostat - Central AC	\$50 Heat Pump \$75 Electric Furnace	\$50 Electric Heat
Smart Thermostat - Central AC	\$75 Electric Heat	\$75 Electric Heat
<b>Water Heater</b>		
Electric High Efficiency UEF >= 0.92	\$50	\$50
<b>ECM Furnace Fan Motor</b> <i>Existing furnace retrofit motor only. No new furnaces.</i>		
ECM Furnace Fan Motor	\$100	\$100
<b>Pool Pump—Variable Speed</b>		
1.5 HP	\$125	\$125
2 HP	\$200	\$200
<b>Dehumidifier</b>		
Dehumidifier - Energy Star	\$25	\$25
