## Commercial and Industrial Energy Efficiency Program

**INDIANA MICHIGAN POWER**

# Custom and Prescriptive Rebate Application

**2023**

**For Indiana Only**

# Welcome to Indiana Michigan Power's Commercial and Industrial Program

Please follow the four-step process to apply for and obtain incentives for your energy efficiency projects.

**The business must be a current electric commercial or industrial customer of Indiana Michigan Power to participate.**

**Incomplete applications cannot be processed for payment.**

Notification of incomplete applications will be sent via email. Applicants will be given 15 business days to respond before the application is deemed ineligible. Applications must be received within 90 days of purchase and/or installation of measures. Pre-approval application is required in advance of Custom projects.

## Need help?

Call us at 833-997-0708 (Mon–Fri, 9 a.m.–5 p.m.) or email [SaveEnergyAtWork@aep.com](mailto:SaveEnergyAtWork@aep.com)

## Submit one of two ways:

[SaveEnergyAtWork@aep.com](mailto:SaveEnergyAtWork@aep.com)

**I&M C&I Rebates**  
16350 Felton Rd  
Lansing, MI 48906

## Project process:

### 1. Complete and submit the pre-approval application.

Submit a pre-approval application and all required documentation before making any purchases or starting any work on the project. Pre-approval is required on ALL Custom projects and is also required on Prescriptive projects that will receive a rebate of \$20,000 or more.

- General information (page 4) and appropriate pages for your project.
  - Prescriptive (pages 6–12)
  - Custom (page 13)
- An itemized quote from selected vendor that includes the quantity, size, type, make and model of proposed items and labor costs, if applicable. Internal labor cannot be included in project cost.
- The manufacturer (OEM) specification sheets for all eligible measures per program guidelines. Must have ENERGY STAR® or DLC energy efficiency certification to qualify for rebates.

### 2. Obtain pre-approval notice.

Upon verifying that the project meets the program requirements, the customer and contractor listed on this application will receive a letter via email (or standard mail if email is unavailable) indicating the funds have been reserved for this project.

- Incomplete applications will result in delays.
- Applications for Prescriptive projects <\$20,000 calculated rebate do not require pre-approval.
- The pre-approval letter must be signed by the customer and returned within 10 business days.
- From the date of issuance of this letter, you will have 90 days or until December 15, 2023 to complete and submit all final documentation. Applicant may submit a written request for one 30-day project completion extension.
- After 90 days or on December 15, 2023, this application will expire and the reserved funds will be forfeited.

### 3. Install your project.

After signing and returning pre-approval notification (if applicable to the project), remove the old equipment and install the new equipment. Incomplete applications will result in delays.

- Only new products, which are exact product types listed in this application, are eligible for Prescriptive incentives.

### 4. Complete and submit the Completion Form.

- Submit the Completion Form (page 14), including all project invoices, after the project is completed.

## For Indiana Only

# Terms and Conditions

**ELIGIBILITY:** Indiana Michigan Power ("I&M") energy efficiency incentives are offered to qualifying electric customers only while funding is available. Projects must be implemented (completed) by December 15, 2023. All application documentation must be submitted within 90 days of project completion or December 15, 2023. Projects must reduce electric usage through system efficiency improvements, control upgrades may also qualify. The following measures will not qualify: peak shaving, demand reductions, fuel switching, power generation, renewable energy, or operating schedule changes. Equipment must meet the minimum number of annual operating hours.

**COMPLIANCE:** All projects must comply with applicable federal, state, and local laws and building codes. All equipment must be new or retrofitted with new components per program specification. Used or rebuilt equipment is not eligible for incentives. Existing equipment must be removed or permanently disconnected. New equipment must meet specification requirements and existing equipment must be operational when the application is submitted. Only one incentive will be granted for each project. Customers can submit multiple projects in a calendar year; however, the incentive totals cannot exceed the incentive limit cap per year. If the project is in a leased building, the lease term must be at least three (3) years and a copy of the lease may be requested. Up to 24 months of utility usage information may be requested.

**INCENTIVE CAPS:** Incentive caps may not exceed 75% of the total project cost, including materials, external labor, permits, equipment rental or disposal. Custom incentives will not be provided for projects with less than a 1-year simple payback or greater than an 8-year simple payback. Retro-commissioning measures are not required to meet these payback guidelines. Incentives are limited to an annual \$150,000 cap per site or \$300,000 cap if your business has multiple sites participating, while Program funding is available.

**INSPECTION:** Program staff reserves the right to conduct pre-inspections and post inspections of proposed and installed projects.

**PUBLICITY:** I&M reserves the right to publicize your participation in this program, unless you specifically request otherwise.

**LOGO USE:** Customers or allies may not use the I&M name or logo nor that of any participating utilities in any marketing, advertising, or promotional material without written permission. If interested in co-branding, please contact I&M at [SaveEnergyAtWork@aep.com](mailto:SaveEnergyAtWork@aep.com) for permission.

**PROGRAM DISCRETION:** Incentives are available on a first-come, first-served basis. Incentive amounts and offerings are subject to change or termination without notice at the discretion of I&M.

**PAYMENT:** Once completed paperwork is submitted, incentive payments are usually made within 6 to 8 weeks. Incomplete applications will delay payments or result in denial of application approval. I&M reserves the right to refuse payment and participation if the customer or contractor violates program terms and conditions. I&M must receive 100% of the energy savings for the rated life of the product(s) or for a period of three (3) years from the receipt of incentive, whichever is less. If you do not provide the energy savings, the facility in which the installed projects are located closes or ceases operation within three (3) years from receipt of incentive, or you cease to be a customer of I&M within (3) years, you shall refund a prorated amount of the incentive.

**RELEASE/INDEMNIFICATION:** Payment of rebates under the Program and/or evaluation of applications for rebates shall not deem I&M or any of its affiliates, employees, contractors or agents ("I&M Parties") to be responsible for any work completed in connection herewith. Applicant fully releases I&M Parties from any and all claims it may have against I&M Parties in connection with this application, the rebates or the work performed in connection with them. In addition, applicant agrees to defend, indemnify and hold I&M Parties harmless from and against any and all claims, losses, demands or lawsuits by any third parties arising in connection with this application, the payment or non-payment of rebates, or any work performed in connection with them. The customer hereby releases I&M and participating utilities from any and all liability arising from or connected with releasing the information to I&M set forth herein.
