

# Free Compressed Air Nozzles for Your Business

Compressed-air generation can be one of the most expensive systems in your facility. It is used to clean, dry, cool, sort, transport objects and much more. Your facility could reduce energy use and help your bottom line by installing FREE energy-efficient compressed-air nozzles.

## Benefits of compressed-air engineered nozzles

Compressed-air engineered nozzles are:

- Significantly more energy-efficient than non-engineered nozzles.
- Capable of working at a much greater distance.
- Increases employee safety.

## Steps to participate

1. Contact us to schedule an on-site demo and to learn more about how compressed-air can help you save energy and money.
2. During the on-site demo, the number of nozzles provided will be based on the facility's current nozzle count, and hours of operational use.
3. Your new Exair nozzles will be shipped to your facility to install within two weeks.
4. We will verify project completion within 2 weeks of the installation via an on-site visit.

## Project highlights

- Free Exair engineered nozzles
- Reduce wasted energy
- Save money
