

Strategic Energy Management

Turn energy efficiency into a lasting part of how your facility operates

COMMERCIAL AND INDUSTRIAL FACILITIES

Strategic Energy Management (SEM) is a no-cost, hands-on program that gives you the tools to lock in energy savings through dedicated coaching and engineering support. Instead of a one-time project, SEM seeks to achieve long-term savings, helping your team evolve and realize its energy-efficient potential.

WHAT'S INCLUDED

- Workshops and coaching sessions focused on improving energy performance
- Modeling tools to monitor and manage energy consumption
- Energy analysis to identify significant energy users and performance indicators
- A “treasure hunt” to uncover savings through controls, maintenance or repairs
- Milestone payments to support your team through key program deliverables
- Incentives based on your verified annual electric and natural gas savings

ELIGIBLE OPPORTUNITIES

- Optimizing processes and controls
- Scheduling or turning off idle equipment
- Cleaning, maintaining or removing unused equipment
- Eliminating energy waste
- Energy efficiency competitions between shifts or facilities

WHY SEM?

SEM builds the habits, tracking, and accountability that keep savings compounding year over year, even as your facility, staff and equipment change.

INCENTIVES

Incentive Payments	Incentive
(2) SEM Milestones	\$1,000 per milestone
Electric Energy Savings	\$0.02 / kWh
